MADE IN DENMARK
..designed for the world!

ROTATING BRUSHES

Total working width: 140 cm

AUTOMATIC DETERGENT DOSING

Capacity: 35 liters

QUICK MOUNTING

Mounted with standard A-frame

The front unit has a working width of 1,400 mm and is equipped with three 500 mm rotating brushes with overlap.

The design allows easy access to corners, around columns, etc., and the rubber edge ensures optimal pickup of cleaning water.

The scrub deck features built-in detergent dosing, with easy refilling directly in the unit and a capacity of 35 liters.

SCRUBDECK

VITRA C-SERIES | RED8110

The smart Scrubdeck ensures efficient wet cleaning of smooth surfaces such as asphalted areas, paths, and parking garages.

The front-mounted unit is equipped with three rotating brush discs arranged in a triangular configuration, providing easier access for cleaning corners and around columns.

Each brush has a diameter of 500 mm and is positioned with overlap, giving a total working width of 1,400 mm.

The brush discs feature individual suspension with integrated height compensation and adjustable brush pressure.

The system includes an automatic cleaning agent dosing function and a 35-liter integrated solution tank located directly in the front unit.

When combined with Vitra's suction sweeper unit, the result is a complete and highly efficient wet cleaning solution with large water capacity. Excess cleaning water is vacuumed directly into the suction container, leaving the surface virtually dry.

MODEL	RED8110
Working width:	1400 mm.
Working speed:	up to 4 km/h.
Cleaning agent:	35 l.
Brush diameter:	500 mm.
Number of brushes:	3 pcs.
Net weight (front unit):	175 Kg.
