VITRA | C2FS2010

MADE IN DENMARK
..designed for the world!

RECIRCULATION OF WATER

Avoid clogged suction hoses

HIGH CAPACITY

0.75 m³ container capacity

HIGH PERFORMANCE

The strongest suction system in its class

SWEEPING SUCTION SYSTEM

VITRA C2-SERIES | C2FS2010

The new Vitra C2 Sweeping suction unit offers a wide range of improvements which, put together, give users an even more effective tool for exterior cleaning!

The suction power is improved by 25% and the energy consumption is at same reduced by 30%. The suction hose is "straightened out", and now runs in a straight rising line from the suction head to the dirt container. The dirt container is extended and has a volume of 750/650 l. Gross/net (*En 15429-2*).

The container is now made of seawater-resistant aluminium, which is corrosion-resistant and light and contributes to a higher load capacity.

As a further improvement, the system is equipped with an efficient hose flushing system, which pumps approx. 18 l/min of water into the suction head, so that the suction hose is always kept clean and free.

A number of exciting accessories are offered for the system, including video surveillance with a camera mounted at the back for better visibility and a camera mounted at the wide 600 mm suction head, so it is easier if necessary. to use the hydraulically operated flap for larger dirt. High-pressure cleaner with 10 m hose reel is also an option.

The wide suction head is equipped with a hydraulic flap which ensures easy collection of larger pieces of waste.

The suction unit is by default equipped with a 6 meter handheld suction hose which ensures great flexibility.

The container is emptied without leaving the cabin and takes place at 175 cm. height, so emptying can take place directly in containers.

MODEL	C2FS2010
Length - Suction front:	640 mm.
Width - Suction front:	1200 - 1900 mm.
Total length: *	3950 mm.
Brush diameter:	650 mm.
Container volume:	750 l. (0,75 m ³) <small>(650 l. / 0,65 m³ netto volume)</small>
Water nuzzles:	4-6 pcs.
Waterpressure:	2-10 bar

* All dimensions are indicated where the unit is mounted on the machine
