MADE IN DENMARK  
..designed for the world!

## DROP SPREADER

Working width: 100 cm.

## HYDRAULIC STIRRER

Ensures even distribution

## QUICK MOUNTING

Mounted with Vitra Quick-shift

The dosage of the spreading material is adjusted easily and simply with a handle located on the left side of the spreader.

The spreader can hold 100 liters of spreading material but can be quickly increased to 170 liters by mounting an expansion ring.

The spreader is equipped with a hydraulic stirrer, which ensures an even spreading of the material.

# DROP SPREADER

## VITRA C-SERIES | RED2050

With these compact drop spreader, you get an effective tool for fighting off the winter, even on small paths and passages.

The drop spreader has a simple but at the same time strong and robust construction and is made for use with either sand or salt. It is built in powder-coated steel and equipped with a galvanized safety grille over the container.

The spreader can contain 100 liters of spreading material, but the capacity can be quickly and easily increased to 170 liters by using a container ring that is bolted to the container.

The hydraulic stirrer, mounted at the bottom of the container, ensures a problem-free and uniform spreading where the dosage of the spreading material is easily adjusted with a handle, located directly on the side of the spreader.

The spreader can be mounted on all models in the C-series.

MODEL	RED2050
Volume:	100 l. (170 l. *)
Width / Working width:	1202 / 1000 mm.
Weight:	75 Kg.

\* Volume with expansion ring)
