Hydraulic emptying of the shovel

Large payload
Built from strong materials

Quick Mounting
Standard A-frame

VITRA

A strong Danish family..

FRONT SHOVEL

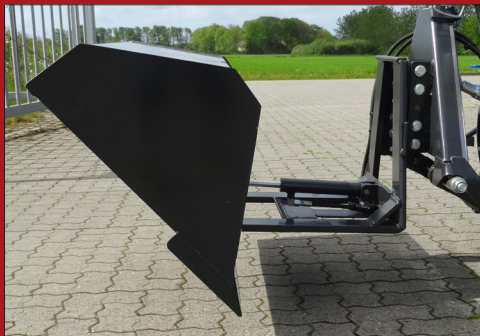

This practical front shovel with its combination of a large payload and a low weight, is the perfect match for Vitras high lift capacity. Despite its low weight, the shovel is a strong steel construction and equipped with a practical, centrally located hydraulic cylinder, that ensures quick and easy emptying of the shovel.

The width of the shovel is either 1,1 or 1,3 metres, which combined with Vitra makes it possible to work close to edges which ensures optimal exploitation of the shovels large volume.

It is built for many years of intense use and painted with powder coating with a particularly high durability. The entire construction is mounted to a standard A-frame, which ensures quick and safe mounting.

- Strong construction on A-frame
- Steel construction with powder coating
- Center mounted tipping cylinder
- Hydraulic tipping
- Possible to work close to edges
- Compatible with all Vitra models

The front shovel is easy to empty, thanks to the strong, center mounted, hydraulic cylinder.

The robust but compact build ensures a large payload and low weight.

The shovel makes it possible to work directly next to edges, so the full width can be exploited.
