SNOW BLADE

Professional build with functionally divided safety shares.

This snow plough is designed for quick and professional snow removal. With the low blade height, it is ensured that the snow is kept close to the ground, and therefore does not harm the surroundings, such as nearby cars

The blade share is divided into four spring affected sections, so each part is folded backwards in case of impact with possible obstacles. The plough is attached to a flexible and suspended frame, which makes it possible to work with high speed. With this plough, snow can be removed with up to 40 km/h.

- Strong construction
- 1,1 – 2,0 m working width
- Four-part share
- Suspended mounting
- Hydraulic angle adjustment
- Supporting leg for easy demounting

The blade is by default mounted with hydraulic adjustment of the working angle.

The flap inserts that are divided ensure that the blade is folded backwards in case of impact.

The blade is mounted to a suspended mounting which is built on a standard A-frame.

Manufacturer:

Lindholdt Maskiner A/S
Industrivej 8
DK-6818 Årre

Tlf: +45 76 77 44 77
Mail: Info@lindholdt-maskiner.dk
Web: www.lindholdt-maskiner.dk

The snowplough is by default shipped with hydraulic swing, so the angle of the brush can be adjusted directly from the cabin.
