From 1700 to 2100 mm

Hydraulic adjustment
Hydraulic angle adjustment

Quick Mounting
Standard A-frame

VITRA

A strong Danish family..

V-PLOUGH

Professional and strongly built V-plough, designed for the most demanding tasks.

The V-Plough is built with spring inserts divided into sections, with a unique trigger-system. Built with horizontal flex-suspension system, which ensures that the plough automatically skips larger obstacles, so no frontal impact takes place.

The construction is supported by a large, centrally mounted skid shoe to ensure optimal clearing in the entire working width of the V-plough. The adjustment of the V-plough's width is hydraulic and can be done directly from the cabin.

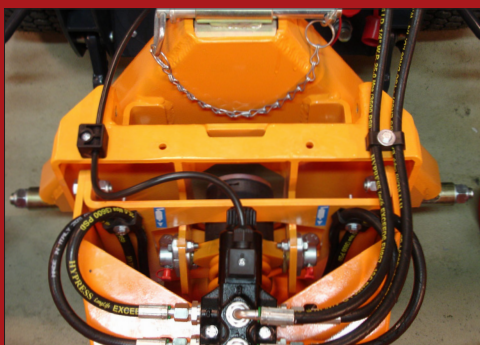

- Height adjustable A-frame
- Horizontal flex system
- Rubber-suspended sliding shoe
- Tripartite flap-inserts
- Reflectors and side-indication flags
- Supporting leg for easy demounting

The V-Plough is built with a horizontal flex-suspension system, to protect against direct impact

The suspended flap is divided into three sections, so only the part that hits an obstacle folds backwards.

The construction is based around a height-adjustable A-frame and designed for demanding tasks.

Manufacturer:

Lindholdt Maskiner A/S

Industrivej 8
DK-6818 Årre

Tlf: +45 76 77 44 77

Mail: Info@lindholdt-maskiner.dk
