*Effective cleaning without picking
up granulate and other filling
materials from the field.*

VITRA

FIELD CLEANER

Large working width
With suction strength spread evenly

Effective collection
But protects the foundation

Quick Mounting
Standard A-frame

VITRA

A strong Danish family..

FIELD CLEANER

Cleaning artificial turf is not a big challenge, but doing so without the filling material being picked up is different, and that is where the LC1000 comes into the picture!

The pick-up front is made to effectively collect leaves and dirt from fields, and thanks to its specially designed suction head, leaves and dirt lying on the surface of the field is effectively removed without the granulate of the artificial turf being picked up.

The rolling brush effectively evens out the granulate, so the field stays clean and even. The front is combined with Vitras grass collector or the suction sweeper.

- Specifically developed for effective maintenance of artificial turf, without collecting the filling material
- Compact build with low weight and large working width
- Built with a standard A-frame system, so the front can be used with a third party's suction sweeper.

The front is built with a standard A-frame – Cat. A and can therefore be installed on a variety of machines.

The suction head effectively collects leaves from the pitch without removing granulate from the bottom of the field.

The hydraulic rolling brush carefully evens out the filling material, to leave the field good-looking and even.

Manufacturer:

Lindholdt Maskiner A/S

Industrivej 8
DK-6818 Årre

Tlf: +45 76 77 44 77

Mail: Info@lindholdt-maskiner.dk

Web: www.lindholdt-maskiner.dk

The suction strength of the field cleaner is evenly distributed throughout the entire working width, and has despite a solid build with a standard A-frame and low weight.

LC1000 (Fits all VITRA models)

Total width	1300 mm.
Working width:	1000 mm.
Net weight:	55 Kg.
Suction hose:	155 mm.
Height adjustment:	15-35 mm.
Hydraulic requirement:	Small PTO
