Strongest suction sweeper of its class

VITRA

A strong Danish family..

SWEEPING SUCTION UNIT

Vitras ground-breaking suction sweeper effectively collects dirt and lower the dust discharge at the same time. The Vitra suction sweeper has obtained the highest approval of EUniteds certified PM 2,5/10 test.

The advantages of the system becomes clear when considering that these results achieved with a minimal water consumption. Vitra typically uses between 35 – 65% less water. Water is a limited resource, and at Vitra we emphasise protecting the environment as much as possible.

- 600 l. netto volume
- 70 liters of water capacity
- Center mounted suction hose
- 5 meter handheld suction hose
- Undload high in 135 cm.
- Suction head with flap for large rubbish

The suction unit is by default equipped with a 5 meter handheld suction hose which ensures great flexibility.

Vitra's suction unit uses a unique cyclone filter system which effectively cleans the air for particle dust.

The wide suction head is equipped with a hydraulic flap which ensures easy collection of larger pieces of waste.
