MADE IN DENMARK
..designed for the world!

DROP SPREADER

Spreading width up to 125 cm.

DISC SPREADER

Adjustable spreading of up to 6 metres

QUICK MOUNTING

Mounted with Vitra Quick-shift

The spreader is equipped with a stainless stirring system, which ensures even distribution of the spreading material.

All parts of the spreader are made from either stainless steel or lacquered with varnish in corrosion-class C5.

Switch between roller- and disc spreader and spreading width adjustment is done easily and comfortably from the cabin.

COMBI SPREADER

VITRA C-SERIES | FWS200 / FWS350

This spreader ensures optimal flexibility, since the system combines the best qualities from both the drop- and disc spreader. This way effective spreading is possible on both small paths and sidewalks as well as bigger areas such as parking lots and community lots.

The switch between roller- and disc spreader happens through one push of a button, on the enclosed control panel from which the spreading width of the plate spreader too can be adjusted from 1 to 6 metres, directly from the cabin. If the spreader is combined with Vitras truck bed, up to 500 litres of spreading material can be carried, which can easily be loaded into the spreader throughout the work day, which ensures a good working environment and high effectivity.

MODEL	FWS200 (C2-SERIE)
Volume:	120 l.
Total width:	1130 mm.
Working width - Drop:	1030 mm.
Working width - Disc:	1000 - 6000 mm.
Dosage amount - Drop:	40 - 200 g/m ²
Dosage amount - Disc:	5 - 40 g/m ²
Weight:	169 Kg.

MODEL	FWS350 (C3-SERIE)
Volume:	150 l.
Total width:	1492 mm.
Working width - Drop:	1250 mm.
Working width - Disc:	1000 - 6000 mm.
Dosage amount - Drop:	40 - 200 g/m ²
Dosage amount - Disc:	5 - 40 g/m ²
Weight:	255 Kg.
