QUICK MOUNTING

Mounted with Vitra Quick-shift

DROP SPREADER

VITRA C-SERIE | RED2100 / RED2105 / RED2110

With these compact drop spreaders, you get an effective tool for fighting off the winter, even on small paths and passages. The spreader is available in two sizes, and is with its simple, but robust and effective build made for salting or gritting paths, sidewalks and similar places.

The container is made from powder painted steel and equipped with a galvanized safety grid and adjustable drop spreader. The spreading amount can easily be adjusted with a handle, located on the side of the spreader.

The spreaders are adjusted to be installed on all Vitra models and optionally with start/stop automatic, so the spreader stops automatically whenever the machine stands still.

The dosage amount can easily be adjusted due to a handle located on the right side of the spreader

The spreaders can be used with both sand and salt and the switch is made directly on the side of the spreader.

The spreader is equipped with a hydraulic stirrer, which ensures an even spreading of the material.

MODEL	RED2100
Volume:	120 l. (215 l. *)
Width / Working width:	980 / 850 mm.
Weight:	82 Kg.
